## Technical Skills

**Languages:** HTML, CSS, JavaScript, React, Node, DAPPs, web3.js, Rust (basic), Solidity (basic)  
**Developer Tools:** Mysql, PostgreSQL, MongoDB, Vim, spl-token  
**Technologies/Frameworks:** React-Native, Express.js, Next.js, Git/GitHub, WebSocket (basic), Redux, Recoil

## Experience

### Tinyminds

Dec 2024 – Present

*React Native Intern*

*Remote, India*

- Designed and developed a **React Native SaaS** app for playground schools with **real-time attendance, class management, and multi-user flow for parents, teachers, and admins.**
- Integrated **push and background notifications, monthly fee graphs, notes system, and student fee CSV export to streamline communication** and school operations.

### Star Marketing

Aug 2023 – Oct 2023

*Software Engineer Intern*

*Remote, Mumbai*

- Developed a staff management system using **PHP and MySQL** for Star Marketing that increased productivity by 30% and reduced communication errors by 40%. The system featured activity tracking, notifications, messaging, and secure OTP email verification.

## Projects

**Q2 Turbin Builder (Breakout 2025 Hackathon)** | Github Link | *Solana, Web3.js, Anchor, Rust*

**Present**

- Built a **Telegram bot to track LP positions and alert** users on price/range changes or claimable rewards. Selected for Turbin Q2. Learning **Solana smart contracts with Anchor.**

**Auto Tweet from YouTube using AI** | Github Link | *Next.js, Twitter/X, NextAuth*

**March 2025**

- Built a web app where users can log in with their Twitter account, paste a **YouTube video link, and automatically generate an engaging tweet.** The app uses AI to analyze the video content and craft a relevant, high-quality post—saving users time and boosting their social media presence.

**Agency Website** | Deploy Link | *Next.js, Framer-motion, Tailwind css*

**Feb 2025**

- Modern agency site with animated services using Framer Motion; clean, responsive, and engaging UI.

**Second-Brain** | Github Link | *Next.js, Clerk, Langchain, Convex*

**November 2024**

- Built a content hub with Next.js, Clerk, Langchain Convex; AI search, notes, tweets PDFs support.

**Creati-V** | Deploy Link | *Next.js, Gemini AI, Assembly AI*

**October 2024**

- Built a full-stack AI content generator with Next.js, Tailwind, Gemini AI, and Assembly AI. Integrated Clerk auth, Neon DB, and Firebase to create images, audio, videos, and text with AI.
- AI-powered Text-to-Image, Text-to-Voice, Video Generation, and Assistant/Chat functionalities.**

**Solana Web Wallet** | Deploy Link | *Solana, Web3.js*

**August 2024**

**Thread App Clone** | Github Link | *MERN, Recoil*

**January 2024**

## Achievements

- Selected for the **CoinDCX Maxi Program, Solana Ackee, and Q2 Cohort of Solana Turbine** —recognized among the top 700 global applicants for outstanding potential in blockchain development.
- Finalist and global semi-finalist** with a rank of 2493 out of 300,000+ coders on TechGig.
- Solved **210+ problems** on Leetcode.
- Top contributor and winner** in BRACKETHACKS & FUNATHON.

## Education

**WEB3 Cohort by Harkirat Singh**

**Aug. 2024 – Present**

*Blockchain, DAPPs, NFTs, Token Generator, DeFi, DevOps*

*Remote, India*

**Bikaner Technical University**

**July. 2019 – Aug 2023**

*Bachelor In Technology in Computer Science*

*Bikaner, Rajasthan*
